# **Recipient so young and talented**

CHRIS Clout Designs took home four BDAQ Regional awards including best residential interior, best pool or water feature, best use of Colorbond steel and best bathroom for the Saltwater House at Noosa Waters.

Chris was also the youngest recipient of the national 2009 Design Excellence Award, receiving the prestigious award at only 25 years of age.

The Design Excellence Award means Chris's designs were the stand-out designs in all of Australia which ranked him number one designer in BDAQ.

Chris was only the second Queenslander to have won the award.

Since he was a little boy Chris took joy in building elaborate and stable cubby houses from bits and bobs in the backyard.

His love of construction led him to a carpenter's apprenticeship before he left to work with his uncle, designer Paul Clout.

Chris designed and built his first home at the age of just 16.

Everything from the furniture to the lighting was a Chris Clout design but as Chris explained, it's simply not enough to just create the house.

"Aspects such as lighting, landscaping, cabinetry and joinery designs, as well as even furniture design, are all important elements in bringing to life the vision we have, and the atmosphere we are endeavouring to create," he said.

Working closely with the client, as well as each individual environment, Chris's designs are fast-becoming known for their style, passion and innovation as they strive to create what Chris described as a resort home.

His designs draw on inspiration from

The Saltwater House features a magnificent pool and custom made gutters to resemble traditional temple rooftops.

south-east Asian resorts and beach houses, with an added modern Queensland touch.

Water, natural light, stone, timber and an innovative use of other natural materials feature heavily in Chris's designs to help create seamless indoor-outdoor living environments.

The Saltwater House is no exception.

Resembling a beautiful Asian-style beach resort, the home features a magnificent pool, custom-made gutters to resemble traditional temple rooftops, a beautiful bathroom hidden behind Shoji-styled doors and a breathtaking but practical interior.

Chris Clout Designs offers clients concept designs, detail plans, full interior design, detailed cabinetry and joinery, colour schemes, and organises all the necessary approvals and permits ready to build.
